Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 41-85 are pending in the present application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 41-62, drawn to a method for treating cancer comprising administering a vector and acetaminophen, classified in class 514, subclass 44.
- II. Claims 63-82 and 84, drawn to a composition, classified in class 514, subclass 44.
- III. Claim 83, drawn to a method for treating cancer comprising administering acetaminophen, classified in class 514, subclass 622.
- IV. Claim 85, drawn to a method for selectively killing cells in a mammal, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons: Inventions of Groups I, III and IV are biologically and functionally different and distinct from each other and thus one does not render the other obvious. The methods of these groups comprise steps which are not required for or present in the methods of the other groups: administration of administering a vector and acetaminophen to a subject (Group I), administering acetaminophen (Group III), conversion of cells to NABQI (Group IV). Thus, the operation, function and effects of these different methods are different and distinct from each other. Moreover, the end results of each of these methods differ. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Art Unit: 1636

Inventions II and I, III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the fact that the product of Group II can be used in the three methods disclosed shows that the product can be used in materially different processes.

Groups I and II are comprised of multiple inventions which are the products or methods drawn to different and distinct promoters and cancers which do not render obvious each other and thus are patentably distinct. If either of Groups I or II are elected, applicants must elect a single invention which is the product or method drawn to one specific promoter as disclosed in claims 47, 50, 52, 69, 72 and 74 and to one specific cancer as in claim 59 to which the claims will be restricted. The promoters and the cancers of the above groups differ functionally, structurally, and biologically from each other such that each can support a separate patentable invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1636

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Konstantina Katcheves whose telephone number is (703) 305-1999. The examiner can normally be reached on Monday through Friday 7:30 to 4:30.
